

**ATL – Timed Dosage**

Analogue Dosing/Metering pump with constant flow rate, manually adjustable flow rate and timed dosage with double regulation.

3 Control Dials provide control of flow rate percentage, T-On regulation and T-Off regulation.

5 Models covering flow rates between 0.4 to 54 l/hr with output pressures upto 20 Bar.

PVDF pumphead casings is suitable for almost all chemicals used in industry, Waste water and Potable water applications.

The use of Ceramic valve balls as standard ensures pumping reliability and chemical compatibility of the entire liquid end.

PTFE Diaphragm designed to provide 5 years working life, reducing diaphragm replacement schedules.

**Wetted Materials**

- Pumphead: PVDF
- Valve Balls: Ceramic
- Seals: FPM or EPDM
- Diaphragm: PTFE
- Suction Tube: PVC
- Delivery Tube: PE
- Tube Connections: 4/6mm (Model 803 – 8/12mm)
- Supply Voltage: 90-265/1/50-60 (20-60/1/50-60 Upon Request)
