

## Invikta - Constant Dosage

A simple yet reliable series of compact, micro-processor controlled solenoid dosing/metering pumps.

Typical applications include Swimming Pools, Car Wash, Cooling Towers & RO systems.

Robust IP65 Polypropylene enclosure protects against jet of water and aggressive environments. Can be mounted directly onto surface or via the supplied fixing bracket, allowing quick removal.

Pumphead has manual priming valve, with flow rate adjustment, from 0 to 100%, via front panel potentiometer.

LED provides indication of pump operating status. Can be equipped with low level alarm upon request.

All Invikta units are supplied with an Installation Kit comprising of a Fixing Bracket, Suction Tubing, Delivery Tubing, Foot Filter and Injection Connector.

### **Wetted Materials**

Pumphead:	PVC
Ball Valves:	Pyrex Glass
Seals & Valves:	FPM or EPDM
Diaphragm:	PTFE
Suction Tube:	PVC
Delivery Tube:	PE
Tube Connections:	4/6 mm
Supply Voltage:	90-265/1/50-60 (20-60/1/50-60 Upon Request)
