

TPG – Proportional Dosage

Digital Dosing/Metering pump with constant flow rate, manually adjustable flow control and proportional flow rate via external 4~20mA or digital pulse (e.g. Water Meter)

The digital version of Model APG, this unit features additional functionality such as Timer, ppm dosing, statistics, password protection and remote On/Off control.

5 Models covering flow rates between 0.4 to 54 l/hr with output pressures upto 20 Bar.

PVDF pumphead casings is suitable for almost all chemicals used in industry, Waste water and Potable water applications.

The use of Ceramic valve balls as standard ensures pumping reliability and chemical compatibility of the entire liquid end. PTFE Diaphragm designed to provide 5 years working life, reducing diaphragm replacement schedules.

Wetted Materials

Pumphead:	PVDF
Valve Balls:	Ceramic
Seals:	FPM or EPDM
Diaphragm:	PTFE
Suction Tube:	PVC
Delivery Tube:	PE
Tube Connections:	4/6mm (Model 803 – 8/12mm)
Supply Voltage:	90-265/1/50-60 (20-60/1/50-60 Upon Request)
